

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

THE WORK OF THE NATIONAL RESEARCH COUNCIL

As has already been announced, the National Research Council is acting as a department of the Council of National Defense, dealing with the organization of science and research as affected by the war.

Direct connection with the work of the Army and Navy, both at home and in the field, has also been established. Brigadier General George O. Squier, chief signal officer, has recently addressed the following letter to the chairman of the Research Council:

DR. GEORGE E. HALE,

Chairman, National Research Council,
Munsey Building,
Washington, D. C.

My dear Dr. Hale: In the Signal Corps questions involving the selection and organization of large numbers of scientific men and the solution of research problems are constantly arising. The National Research Council, organized at the request of the President, and acting as a department of the Council of National Defense, in close cooperation with similar bodies abroad, has federated and co-ordinated the scientific resources of the country and concentrated them upon the solution of military problems. It is accordingly the one agency in a position to meet the present needs of the Signal Corps.

I therefore request the Research Council to act as the advisory agent of the Signal Corps in the organization of its various scientific services and the solution of research problems. To this end I would suggest that Dr. Robert A. Millikan, vice-chairman and executive officer of the Research Council, apply for a major's commission in the Officers' Reserve Corps, for detail in charge of this work.

Very truly yours,

GEORGE O. SQUIER,
Brigadier General,
C. S. O.
